SEEDSMAN

SYRACUSE : NEW YORK

To Our Friends and Customers

IN PRESENTING our 1925 SEED ANNUAL to the public we wish to call the reader's attention to the fact that SAUL'S SEEDS come to you in plain envelopes and packages and that our customers **pay for seed only**. In comparing this with any other reputable seedman's catalogue, it will be noticed that our prices in many cases average the lowest. This is due to our policy of investing more of our money in seeds and saving the expense of a larger and more expensive catalogue, contracting our seeds in large quantities and giving our customers the benefit—of the difference in price. SAUL'S SEEDS are tested and selected from the most reliable sources that our experience of forty-six years in the business can obtain and every five cent package and upward is weighed up from the bulk when the order is received. No packages already measured out and sealed, carried in stock except in flower seeds which in some cases are so small in size and light and expensive that they have to be measured or counted to sell in small lots, this is done before the seed season opens to save time but only in the case of expensive seeds. We do not believe in freak novelties and hence you will find everything listed in this catalogue under its true name.

Seeds Delivered Free by Parcel Post

We will deliver free to any place within 300 miles of Syracuse by parcel post or express (our option), all vegetable and flower seeds in packets; ounces, $\frac{1}{4}$ lb., $\frac{1}{2}$ lb., 1 lb. and 2 lb. packages at the prices in this catalogue.

Our Terms are Strictly Cash with the Order. We do not send C. O. D., as the cost of collecting return charges is quite an unnecessary item of expense and the prices being given, we can conceive of no necessity to warrant goods being so sent.

How to Send Money. Remittances may be made **at our risk** by any of the following methods, viz.: **Postal Money Order, Draft on New York or Chicago, or Express Company's Money Orders, or cash by Registered Letter.** We accept clean postage stamps the same as cash.

The rates charged for Postal Money Orders and Express Money Orders are now so low that these are the best way to remit. We will bear the expense of sending money in either of these ways. Deduct the cost of the order from amount sent, Express Money Orders can be obtained at all offices of the principal Express Companies. They are **cheap and absolutely safe.**

Guarantee: Complaints made that seeds are not good, should quite as often be attributed to other causes as to the quality of the seeds. There are hundreds of contingencies continually arising to prevent the best seeds always giving satisfaction, such as sowing too deep, too shallow, in too wet or too dry soil; insects of all descriptions destroying the plants as soon as or before they appear; wet weather, cold weather, frosts, chemical changes in the seeds, induced by temperature, etc. For the above reasons it is impracticable to guarantee seeds under all circumstances.

We give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

CHAS. F. SAUL, Syracuse, N. Y.

Space in this little book does not permit description and prices of our most complete line of the following:

Sweet Peas a

Pkt. 5c, oz. 20c, $\frac{1}{4}$ lb. 50c, lb. \$1.75.

Sweet Peas are among the most beautiful of all our hardy annuals. Select a sunny, open place, several feet from any building, or close fence, and as far as possible from large trees. Sow as early in the Spring as possible. Do not wait for fair weather. Plant in double rows 6 in. apart and 4 in. deep, dropping the seed 3 in. apart. Furnish support early. In dry weather water freely and keep the flowers picked close. If you allow them to produce seed pods the plants will soon stop flowering.

NEW ORCHID-FLOWERING VARIETIES

Countess Spencer. The coloring is a soft rose-pink, which deepens at the outer edge and becomes still richer or more heavily suffused in cool weather. In size, form and coloring, Countess Spencer is simply exquisite. The plant is a strong, vigorous grower and the large flowers are borne three and four upon long stiff stems. Pkt. 10c, oz. 35c.

Sweet Peas—Cont.

Gladys Unwin. A bold flower, with striking upright standard, which is crinkled and waved; broad wings. Of a lovely light pink color. Pkt. 10c, oz. 35c.

Phyllis Unwin. The flowers are larger in size than the original Gladys Unwin and similarly crinkled wavy standard, with broad wings. The long, stout stems carry three and four flowers each; of a beautiful rose color throughout. Comes perfectly true from seed. Pkt. 10c, oz. 35c.

Florence Morse Spencer. This might be described as a light pink-edged Countess Spencer. The flowers are extremely large, of the finest open wavy form; they are borne upon strong, stiff stems, four flowers to each stem. This new strain now first offered, comes perfectly true from seed and will delight all lovers of the Spencer type. Pkt. 10c, oz. 35c.

Select Mixed Spencers. This mixture contains the cream of the new and rare varieties; made up entirely of separate named sorts and carefully proportioned as to its composition. Pkt. 5c, oz. 25c, $\frac{1}{4}$ lb. 60c, lb. \$2.25.

Lawn Making

LAWN making has been reduced to a science by the Department of Agriculture. Experiments have demonstrated that the stand-by of lawns in this country, where lawns can be made, is Kentucky blue grass; and that the best method of obtaining a blue grass lawn is to sow a mixture containing red top. The latter germinates more quickly, and helps make a thick lawn the first few years, but gradually gives way to the spreading blue grass. White clover is usually mixed in, where clover is not objectionable, because it helps thicken the early turf, and secretes nitrogen from the air, which helps the grass. Our grass seed is exactly what we represent, recleaned and free from weeds.

Loosen the soil in which a new lawn is to be made to a depth of at least five inches, and lighten it with humus or several inches of sand, compost, manure or wood ashes if it is heavy and inclined to bake. Apply fertilizer liberally, either sheep manure, bone meal or a commercial fertilizer.

Sow in the early spring when cool weather and ample rainfall will insure complete germination and a good start for the seedlings before hot dry weather comes.

If seeding must be delayed, special precautions must be taken to prevent the ground drying out. Early fall is a very desirable time to plant.

See that the seed is well covered. Rake it into a new seed bed and roll so that the soil is firmed over the seed. Where seed is sown on an old lawn always cover it with a top dressing of sand or soil and fertilizer. Seed thrown on the top of hard ground has no chance to grow and will merely wash off.

Quantity to use — On new lawns, use 1 pound for 300 square feet; 5 pounds for 1,500 square feet; 10 pounds for 3,000 square feet; 15 pounds for 4,250 square feet: 25 pounds for one-fourth acre; 100 pounds for one acre. To replenish lawns where turf is thin use half quantity.

Saul's Central Park Mixture—Of scientifically balanced *blue grass, red top, white clover. Pound, 35 cents; 5 pounds, \$1.50.

Saul's Shady Lawn Mixture—Especially prepared for shady places and sandy soil. Pound, 40 cents; 5 pounds, \$1.85.

Kentucky Blue Grass—Recleaned, heavy seed, pound, 40 cents.

Red Top Grass—Fancy recleaned seed, pound 30 cents.

White Clover—Fancy seed, pound, 70 cents.
